Everything you need for work and weekend

HTC Hero

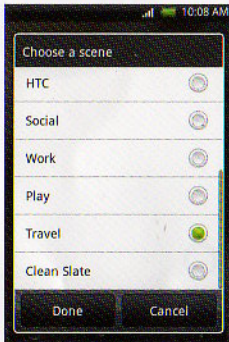

[htc.com](http://htc.com)

htc  
quietly brilliant

HTC Sense™ - an intuitive, seamless experience built upon three fundamental principles  
 - make it mine, stay close, and discover the unexpected

## Make it Mine

With HTC Scenes, the HTC Hero becomes multiple phones in one. Create and switch between Scenes that reflect different moments in your life. Hero offers 6 standard profiles as well as numerous customisable for your design. Each of Scene features 7 scrollable home screens.

Your Hero becomes a Work phone that lets you quickly

access to emails, calendar, stocks and Internet browser. And when you go on a trip, your Hero becomes your personal guide and gives you instant access to local time and weather.

It also helps catch up with your favorite friends via Twitter and capture some memories with HTC Footprints™. The widgets themselves can be personalized with a variety of designs and sizes that best match your personality

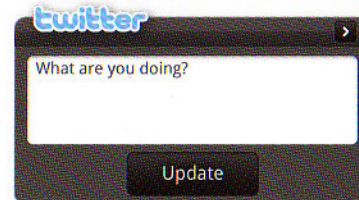

## Stay Close

Keep up with your friends' lives and share your thoughts and feelings with the world. A quick update of your Facebook™ status, right in your contact card, will announce your recent experiences to all your friends.

And when you have some thoughts to tweet to your followers, just broadcast them with the Twitter™ page right from your home screen.

The HTC Hero will import your Facebook and Twitter profiles and update the details of matching contacts (photos, status updates or 'Tweets' and profile image), doing all the hard work for you, giving you plenty of time to enjoy reading about what your friends are getting up to, leaving them comments and 'poking' them back.

Twitter is a trademark of Twitter, Inc., and is used under license.

## Discover the Unexpected

Many of the most memorable moments in your life are experienced, not explained. You can find a person by dialing their phone number or simply by dialing the first few letters of their name.

Your inbox is not just a list of emails, but a catalog of conversations, a collection of notes flagged as important, and a document library of all your emails with attachment. Your Album is not just the photos saved on your phone. It is also a gateway to online collections of you and your friends on Facebook or Flickr.

Search just about anything, anywhere on your HTC Hero. The dedicated Search button combs through tweets in Twitter™, locates people in your contact list, finds emails in your inbox, searches attractions in the Footprints or asks for advices from the powerful Google search on your Browser.
